**AMENDMENT**

Sir:

Responsive to the Office Action mailed on December 4, 2002, please amend the above-identified application as follows:

**In the Specification:**

Please amend the specification as follows:

Please replace the paragraph starting on page 1, line 8 and ending at page 1, line 13 with the following paragraph:

c1  
--The present invention relates generally to dynamically changing compression techniques used for transmission of voice information over a packet switching environment and for transmission of fax information on a telephone line, in real-time, the telephone line being also used for transmission of voice information over a packet switching network environment and particularly for loading an overlay compression layer during a telephone conversation upon user initiation or automatically.—

Please replace the paragraph starting on page 3, at line 17 and ending at page 3, line 24 with the following paragraph:

c2  
--A problem that arises with respect to prior art systems similar to Fig. 2 is that only one type of compression algorithm is employed for the duration of a phone call. That is,
